

Power Tal Fast

High-quality, protective fast dry paint for concrete, wood & steel structures.

Description: -

Power Tal Fast is a high-quality one-component fast dry protective paint based on premium modified alkyd resins.

Power Tal Fast is characterized by good weather resistance, fast drying & protective coating for wood, concrete, and steel structure surfaces (interior & exterior)

Usage: -

- Used for wood surfaces.
- Used for steel structures.
- Used for concrete protection.
- Used for steel tanks.
- Used for warehouses & workshops.
- Available in different colors.

Advantages: -

- One component fast dry top coat paint.
- Easy to apply and use, whether with a spray gun, roller, or brush.
- High adhesion strength on different surfaces.
- Available in multiple attractive colors or custom colors upon request.
- Attractive smooth finish.
- High durability and Color Stability.
- High hiding power & good coverage rate.
- High weather resistance.

Characteristics: At 25°

color	Available in different colors upon customer request
Density kg/liter	1.22 ± 0.05
Initial setting time	15 : 20 min
Final setting time	24 hours
Re-coating time	3 : 5 hours
Rate of use	7 : 9 m ² / kg (50 microns)
Thinner	Power solve 4
Gloss	Semigloss

Note: Use rate depends on substrate, thickness, application & surface preparation.

Dilution Rate:

10 to 20% of the product's weight. (Depends on application technique)

Application Tools:

Roller, brush, spray gun.

Application instructions: -

- The substrate must be cleaned well, and free from dust, oils, grease, and friable particles and rust must be removed in the case of metal surfaces.
- Sand the old paint surfaces well to remove any rust, if present, and then clean the surface.
- Stir the product before application to obtain optimal finish.
- Apply one or more primer coats as needed of Power Primer to obtain the perfect finish, our Power products are recommended.
- Apply the paint according to standard procedures, using a brush or roller, painting horizontally and vertically while ensuring complete coverage of the surface to be painted or sprayed.
- Apply the second coat if needed after 3 : 5 hours.
- Typically, two coats of Power Tal Fast are applied, ensuring the first coat is completely dry.
- If necessary, thin the product with Power Solve 4.

Safety precautions: -

- The product should be applied in a well-ventilated area.
- Gloves, protective clothing, and eye goggles should be worn during application.
- Never eat, drink, or smoke during application.
- In case of skin contamination, wash the contaminated area with water and soap.
- In case of eye contamination, immediately wash with abundant lukewarm water and consult a doctor immediately.
- Avoid spilling residues of the product into any watercourse or soil.

- The used tools should be washed immediately after completion with the cleaning solvent Power Solve 1.
- Dispose of product residues or empty containers according to local environmental regulations.

Packages: -

1 kit in volume [Gallon 4 kg].

[Pail 20 kg].

[Drum 200 Kg].

Storage: -

The product should be stored for two years in tightly sealed containers and under appropriate storage conditions.
